## NOUVEAU

JEWELLERY

We recommend any of the below mentioned easy ways to measure your ring size

1. Using your current ring
2. Measuring without a ring

## 1. USING YOUR CURRENT RING

1. Select a ring that properly fits the intended finger. Engagement and Wedding rings are traditionally worn on the ring finger on the left hand.
2. Place the ring over the circles below, matching the inside edge of the ring to the circle nearest in size. This measurement refers to the inside diameter of the ring.
3. If the ring falls between two sizes, order the larger size

Measurements match the inside edge of the ring

## 2. MEASURING WITHOUT A RING

## A. MEASURE FINGER USING A STRING

Please follow the instructions below to determine your ring size and compare the result to our ring size table.

Make sure that the string is adequately positioned on your finger, since ring sizes are a matter of millimeters.

1. Take a piece of non-stretchable string/ribbon
2. Wrap it comfortably around your ring finger close to your knuckle
3. With a pen, carefully mark the spot where the string/ribbon overlaps. For best accuracy make the smallest marks possible

In this example the circumference is 44.2 mm so the ring size is 44 as per US ring size guide

## B. USING PAPER SIZER (US SIZER)

1. Cut the above ring sizer along the outer line and create small opening where it says 'CUT HERE'.

In this example
the ring size is 11

In this example
In this example
the ring size is $12^{1 / 2}$
2. Encircle the ring sizer at the bottom of the finger with readings facing towards you.
3. Insert the pointer of the sizer through the opening.
4. Identify the larger part of the finger, which is normally the knuckle, make sure that sizer moves through it smoothly.
5. With minor adjustments of sizer, complete the circle to place comfortably on your finger.
6. The reading that coincides with the opening indicates the accurate ring size of your finger.
7. This ring should fit your finger comfortably: snug enough so that it will not fall off, but loose enough to slide over your knuckle.

Finger size changes depending on the time of the day and the weather. For best results measure your finger size:

1. At the end of the day and when your fingers are warm (Fingers are smaller in the early morning and when cold.)
2. Measure finger size 3 to 4 times to eliminate any reading error.
3. In case the reading comes between two numbers take the average.

## INTERNATIONAL SIZE CONVERSION

To place your order use the International Ring Size Chart listed on the next page to determine your ring size according to your country's measurement standard.

## INTERNATIONAL RING SIZE CHART

| Circumference (mm) | Diameter (mm) | Europe | UK \& Australia | United States \& Canada | China | Singapore \& Japan | Hong Kong | Switzerland |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 44.2 | 14.1 | 44 | $\mathrm{F}^{1 / 2}$ | 3 | 6 | 4 | 6 | 4 |
| 44.8 | 14.3 | 45 | G |  |  | 5 |  | $5^{1 / 4}$ |
| 45.5 | 14.5 |  | G1/2 | $3^{1 / 2}$ | 7 |  | 7.5 |  |
| 46.1 | 14.7 | 46 | H |  |  | 6 |  | 61/2 |
| 46.8 | 14.9 | 47 | $\mathrm{H}^{1 / 2}$ | 4 | 8 | 7 | 9 |  |
| 47.4 | 15.1 |  | 1 |  | 9 |  |  | 73/4 |
